

Case Study

Learn about our customer success stories.

THE CHALLENGE

A Seattle-based lender needed construction monitoring on a national scale with a quick turn around.

SOLUTION

1. Implemented a comprehensive field management software solution.
2. Collaborated on a project portal which enabled our client to enter their projects and order draw inspections.
3. Established a comprehensive pricing model for all types of projects.

RESULTS

-  Inspections with photos were created in real-time which allow for a fast turn around time to the lender.
-  Allowed the client to enter all the project details and documents in place for review.
-  Client can now quote pricing to their various customers without needing to check in with us first.
